

# CO-LOCATION

## Reliable, secure, connected.

Co-location services are available throughout NZ in our purpose-built and professionally operated data centres and exchanges. Enabling you to deploy your IT assets and provide world-class connectivity and services to your clients.

### Secure

Security solutions to meet business requirements. 24x7 guards, CCTV with remote monitoring and swipe-card access. Supervised and unsupervised access options available.

### 24/7 access

Access to your equipment any time means installations and maintenance can happen when you want it, on your schedule.

### Carrier neutral

Spark co-location facilities welcome all carriers and parties with access to the fibre distribution frame – 'meet me point'.

### Remote hands

Nationwide coverage of highly trained telco and IT field engineers means help when you need it, around the clock.

### Lower costs

Spark co-location facilities are where NZ meets, meaning interconnects are simple and cost effective.

### Reliable

Our facilities are designed with resilient power and cooling systems, fire detection and prevention systems.

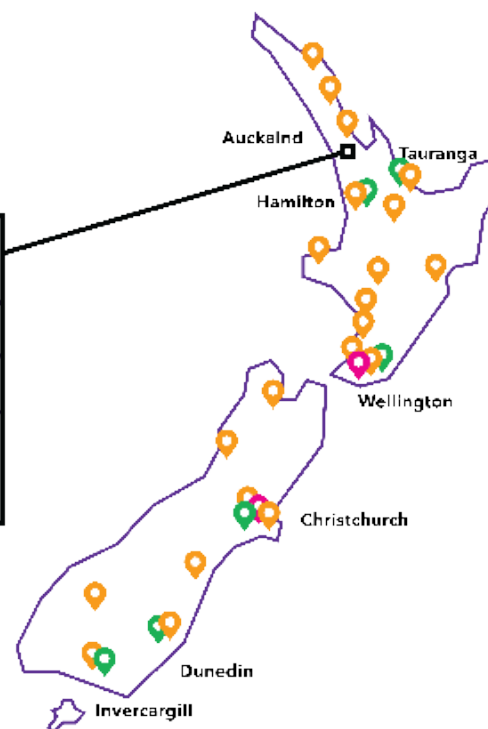

The Spark data centre based in Takanini.

#### Data Centre and Exchange Facility

-  Tier 2 Data Centre
-  Tier 3 Data Centre
-  Exchange Facility
