

TASMAN

CLOUD

CONNECT

Tasman Cloud Connect enables dedicated, fast and secure connectivity to Amazon Web Services and Microsoft Azure.

Spark's Tasman Cloud Connect is a Carrier Ethernet service which is managed, carrier grade and a point to point layer 2 data transfer solution. It is used for connecting a customer's office, data centre or infrastructure at speeds and performance standards to cloud infrastructure in Australia.

Control

Managed by a 24/7 helpdesk to ensure network optimisation.

Network

Carrier Grade Ethernet connectivity based on the MEF 2.0 framework.

Speed and Security

Offering speed and security that are flexible enough to cater for cloud applications.

Reduce Cloud costs

The Data Transfer rate with Amazon Web Services is charged as a flat rate.

Scalability

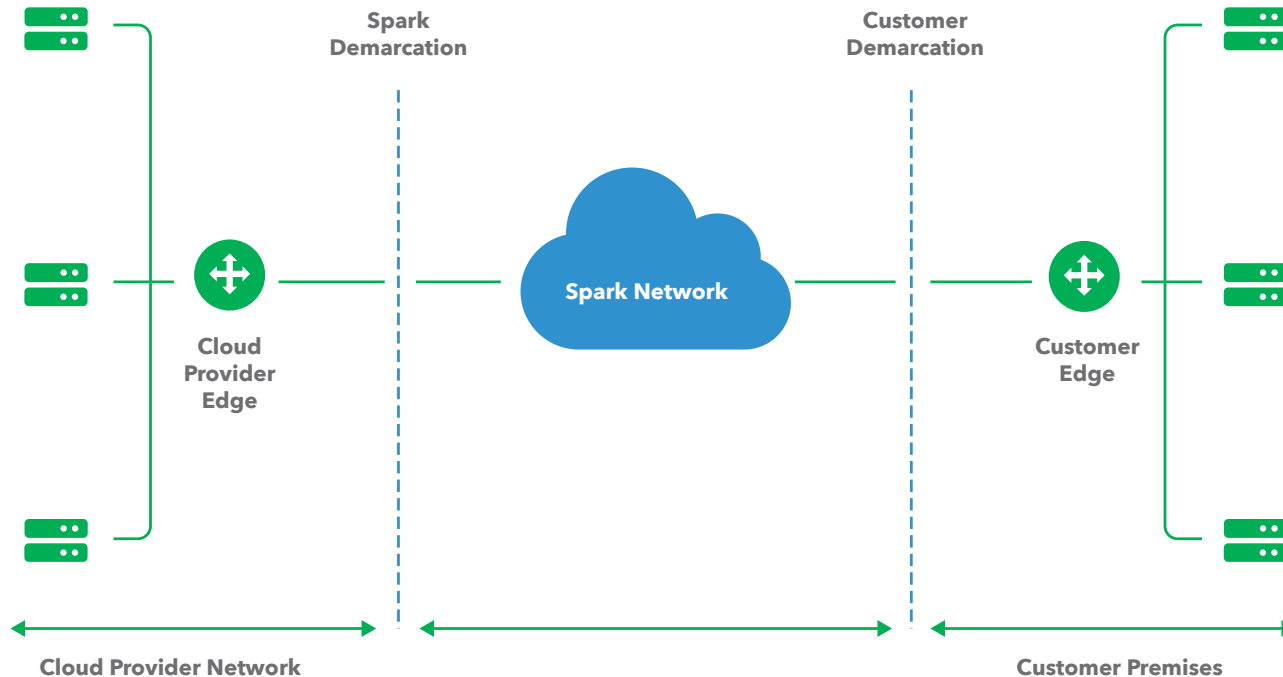

Large scale connectivity options.

Compatibility

Compatible with all Amazon Web Services.

National and Trans-Tasman coverage

The Tasman Cloud Connect (TCC) service provides point-to-point connectivity between two sites / user-network-interfaces (UNIs) and provides a high degree of transparency for Service Frames between the UNIs. In the case of TCC the UNIs are referred to as the Cloud Provider Edge and Customer Edge. Because of the high degree of transparency of this service all Service Frames are mapped to a single Ethernet Virtual Connection (EVC) at the UNI.

Key Product Features

Reduces bandwidth costs by transferring data directly to Amazon Web Services (AWS) and Microsoft Azure charged at a reduced rate

Uses industry standard 802.1q VLANs

Speeds include 50Mbps, 100Mbps, 200Mbps, 300Mbps, 400Mbps, 500Mbps and 1Gbps

Private network with latency <70ms and jitter <10ms

Uses private virtual interfaces from your premise directly to AWS and Microsoft Azure

Excellent for using large datasets

Easy to scale to meet growing business requirements

MEF 2.0 accredited for assured performance and aligned with international standards

Service availability of 99.98% and SLA's available both domestically and Trans-Tasman

24 x 7 service helpdesk available
